INTERNSHIP

TechnoFormatics (SMB COMMUNICATION PRIVATE LIMITED) January 2025 – Present
Full Stack Developer

- Developed the frontend for the College Details and Compare College pages in the MyCollegeMentor project using React.js and Tailwind CSS, ensuring a responsive and user-friendly interface.
- Designed the database schema using dbdiagram.io, created interactive forms for student data collection, and integrated structured workflows to optimize data management and retrieval.
- Enhanced the platform's digital presence by designing logos, posters, and social media creatives using Canva, aligning with branding strategies and engagement optimization.

CodSoft

May 2024 – June 2024

Frontend Developer

- During my internship at Codsoft, I developed a landing page for headphones and the frontend of a women's shopping website using React. I designed a user-friendly interface that enhanced the shopping experience, ensuring a visually appealing and responsive design. The project involved implementing dynamic product displays and efficient user interaction handling through reusable React components

PROJECTS

foodHub | MERN Stack

March 2024

- It is a food Ordering website where you can order food.
Frontend:- HTML5, CSS, JavaScript, React.js for UI Components.
Backend:- Node.js for server-side scripting, Express.js, JSON web Tokens for secure authentication, Stripe API for Payment processing and Paypal for payment.
DATABASE :- MongoDB..

Woman's Fashion-shopping-website | JSX , CSS, ReactJs

May 2024

- It is a Shopping Website for Woman
Developed a visually appealing and user-friendly interface using React.js and CSS, ensuring a seamless shopping experience across all devices with a fully responsive design. Implemented a dynamic product catalog allowing users to easily browse and filter items, while leveraging React's state management and reusable JSX components for efficient handling of user interactions..

Room Rental System | MERN Stack

August 2024

- Built a room rental system with real-time chat and Google Maps integration for location visualization and calculate shortest path.
- Backend: Node.js, Express.js, MongoDB, Prisma. Real-time: Socket.io, Multer for image uploads.

SKILLS

Languages: JAVA, JavaScript, SQL, HTML, CSS

Developer Tools: VS Code, Code Block, Git, Github, Postman

Technology's/Frameworks: ReactJS, NodeJS, ExpressJS, Redux, jQuery, TailwindCss

DATABASE: MongoDB , MySQL

Achievements

- Solved 300+ coding questions across different platforms such as LeetCode and GeeksforGeeks.
- Secured AIR 609 in NIMCET Examination 2022.
